

**Multipaneled Radius Wall Sign
Life Sciences Complex
UNT in Denton, Tx**

Stone Legends signs are made of top quality Cast Stone materials, a man made stone much like natural cut limestone.

We use a dry-tamp technique that produces a superior finish and a harder stone.

Stone Legends is a member of The Cast Stone Institute and our stone meets or exceeds all the specifications for hardness, durability, and moisture resistance.

We produce architectural cast stone for any style or usage. From pavers and panels to huge entryways and spiral staircases, we have hundreds of stock designs and sculptors of staff for your custom designs.

Cast Stone Signs

Custom Designs and Top Quality Stone
by

STONE LEGENDS

PANELS

Our Signs start with Cast Stone panels. We make panels from 8 inch squares up to 46 inches, depending on the thickness of the panel.

Larger signs are produced in multiple panels. Note the sign under the bucking bronco at the far right. It is made of 6 separate panels, and the bronco relief is also made of many separate panels. We also create large radius wall signs such as on the left side of the opposite page.

Our standard panels come in circular, elliptical and rectangular shapes, and we can create any shape as a custom part.

LETTERING

We offer two lettering styles,

1) **Cast In Lettering**, made as part of the tooling. It can be recessed, which can have a "V" shape or a square recess, as seen to left, and on the front cover, or it can be raised such as the Borden sign below.

2) **Sandblasted**, which is often painted afterwards, see below.

CUSTOM ART

Custom art is a specialty at Stone Legends. We can produce art to match any image. We also can apply special finishes and custom colors.

Raised Cast-In Lettering

TESTIMONIAL

This is the stone work that Stone Legends did for Northwestern Oklahoma State University in Alva, Oklahoma. We are repeating the sign for the Woodward campus. The signs really look sharp and the University is very happy with them.

Roy Easley
Easley Associates
Architects

They love it so much, they use it on their online greeting cards.

Ranger and Bronco relief in the progress of being sculpted

Note the print sample drawing along side the sculpture. We can create custom cast stone art for you, from any design source you have.
