

Project Timeline

You decide when we start.

There are three major critical dates in the timeline.

1) The Bid - We send you a detailed bid package that details what cast stone products we will produce for your project. When you receive our bid package, review it and sign if you accept the terms. When we receive the signed bid, we will start the final design process.

2) The Submittal - We will send you a Submittal package that exactly describes each stone you will receive and where it is installed, in detail, eliminating any confusion. When we receive the approved submittal and your deposit, we will begin the production of your cast stone order.

3) Delivery - Once the final approval, production, curing, and packing are completed, we will ship the stone to you, coordinating with your contractors and schedule to arrive at the just right time.
