

# Project Timeline

## Orchestration The Customer's Schedule

A construction project is like a piece of music

If the band isn't together, then the most beautiful music can sound like a train wreck.

Let us help you orchestrate your project. We will help you make sure your deadlines are met. When your project is being designed, we are thinking about the delivery date, and how long each step will take. The critical dates are mile markers on the road to completion. We make sure we pass the milestones on schedule, and we will keep you aware of the time we need to get your cast stone completed on time and within your budget. Call us and see how we conduct our business.
