## How to Attach a Keystone

Note: The requirements for attaching stone to structures, varies among the different States. A certified engineer that is familiar with the Geologic Seismic & Climatic conditions of your area must determine the best method for attaching the stone to the structure. The stone supplier is not responsible for providing information on attachment methods and can only provide suggested attachment methods. These suggested methods are well known and have been used throughout the industry. The Stucco/Stone must hide all attachments.

## Cutting & Fitting of a Keystone

Cutting is only required on the Window or door surround where the keystone will be fitted, not on the keystone itself. The only cutting to the keystone will be in the back where installation attachments will be located
