

Great product!!!!!!!

You guys are looking much better in the subcontractors' eyes. You're labeling, packing, coordination and general customer service not to mention product is 100 times better than the foam stone supplier on building D. They are starting to see the error of their ways.

Greg Valdez

Meridian, Idaho

*This is about the cast stone for Meridian Town Center mall in Idaho. The owner adopted SL as the exclusive stone supplier for much of their project, but they used a foam based faux-stone product on one building (Designated Building "D")*
